Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Original) A method for initiating an online meeting over a data network between a host party with a first computer and an attendee party with a second computer, where a phone connection exists over a telephone network between a first phone of the host party and a second phone of the attendee party, the method comprising:

sending a start meeting message over the data network to a data center; receiving a meeting identification from the data center;

storing the meeting identification in a first device, which is coupled to both the first phone and the first computer; and

retwork to a second device, which is coupled to both the second phone and the second computer.

- (Original) The method of claim 1, comprising:
 receiving the meeting identification into the second device; and
 using the second device to send a join meeting message over the data network to the data center.
- (Original) The method of claim 1, wherein the telephone network comprises a public switched telephone network.

Appl. No. Examiner Docket No. 10/699,103 Backhean Tiv 16440,4033

- 4. (Original) The method of claim 1, wherein the data network comprises an internet.
 - (Original) The method of claim 1, further comprising:
 encoding the meeting identification by the first device prior to transmitting the meeting identification over the telephone network to the second device.
- 6. (Original) The method of claim 5, wherein the second device receives the meeting identification by monitoring the phone connection to detect the encoded meeting identification.
- 7. (Original) The method of claim 6, wherein said encoding converts the meeting identification into a dual tone multiple frequency (DTMF) signal.
 - 8. (Original) The method of claim 1, further comprising: initiating an audio recording of the meeting by user input on one of said devices.
 - (Original) The method of claim 1, further comprising:
 recording audio of the meeting from the phone connection through one of said devices to the compute coupled thereto.

10. (Original) The method of claim 1, further comprising: recording audio of the meeting from the phone connection within flash memory of one of the said devices.

- 11. (Original) The method of claim 1, further comprising: enabling a privilege-to-record field for the attendee prior to allowing an audio recording of the meeting by way of the second device.
- 12. (Original) The method of claim 1, further comprising:a third party with a third computer joining the meeting using a third device which is coupled to both a third phone and a third computer.
- 13. (Original) The method of claim 1, further comprising: receiving an audio message from the data center and playing the audio message to one of said parties.
- 14. (Original) The method of claim 13, wherein the audio message includes instructions relating to the meeting.
- 15-28. (Canceled)
